

Bull Valley Australian Labradoodles

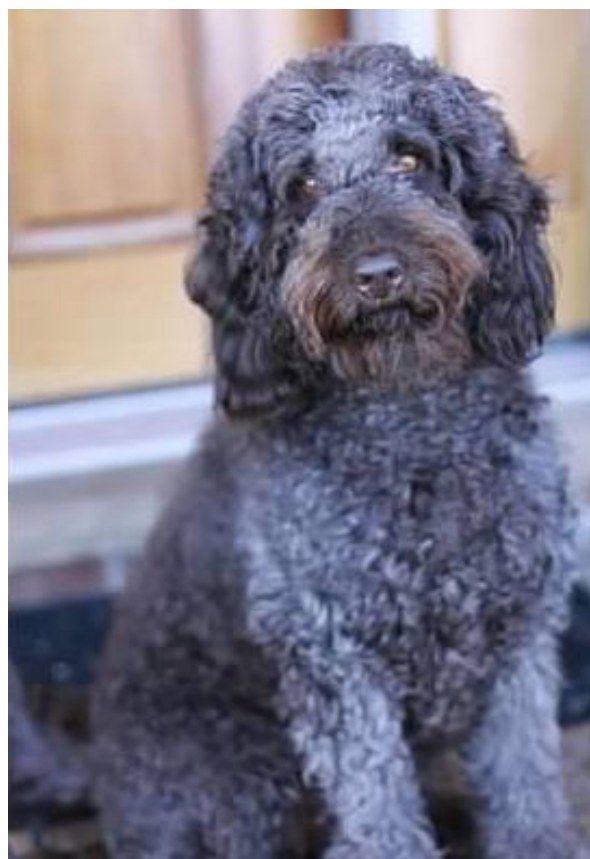

**Socialization is the key to a well-rounded puppy.
The first 16 weeks is the critical socialization period of a dog's life.**

RULES OF SOCIALIZATION:

- Make it fun for your puppy!
- Don't force your puppy to confront their fears as this can backfire and create an aggressive/fearful response.
- Go at your puppy's pace. Let them initiate each approach to something new and allow them to retreat when they need to feel safe.
- Your puppy may be socialized to your household but you need to continue to expose them to new things, places, and contexts.
- Pair treats with exposures to make good associations if necessary and remember that socialization is time-sensitive.

**Below is our recommended
Socialization Checklist.**

Meeting People:

- Males & Females
